

MAHDEN SALEH

Kansas City, Missouri | (913) 735-7689 | msmahden@gmail.com | linkedin.com/in/mahden | smahden.github.io

PROFESSIONAL SUMMARY

Computer Science graduate and full-stack software engineer who designs, builds, and ships responsive web applications end-to-end, from database schema to user interface. Skilled across JavaScript, Python, Java, C++, PHP, and SQL, with hands-on React, RESTful APIs, relational databases, and content-based filtering. Shipped a full-stack adaptive learning platform (thesis) and an internal employee-management system (internship), plus a portfolio of tested, documented projects across machine learning, back end, front end, and security.

EDUCATION

Bachelor of Science in Computer Science

University of the East | Manila, Philippines

Relevant Coursework: Data Structures, Automata Theory, Artificial Intelligence, Data Analytics, Software Engineering

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C, C++, C#, PHP, R, SQL, HTML5, CSS3

Front End: React (Vite), Sass, Responsive Web Design, Single-Page Applications, Component-Based UI, Accessibility (ARIA), Figma

Back End & APIs: Node.js, Express, FastAPI, PHP, RESTful APIs, CRUD Operations, JWT Authentication, Server-Side Validation

Databases: MySQL, SQLite, SQLAlchemy, Relational Database Design, Schema Design, Query Optimization

ML & AI: Content-Based Filtering, Recommendation Systems, TF-IDF, Cosine Similarity, Ranking Metrics, Data Analytics

Security: HTTP Security Headers (CSP/HSTS), Secret Scanning, Password Hashing and Entropy, Access Control, OWASP Top Ten

Cloud, Tools & Testing: Microsoft Azure, Git, GitHub, GitHub Actions (CI), Jest, Pytest, Playwright, Agile/SDLC

EXPERIENCE

Software Engineer / IT Support Intern

May 2024 - July 2024

ToonCity

- Developed an internal employee-management web application using PHP, Sass, and MySQL to centralize records and streamline operations.
- Implemented RESTful CRUD operations with server-side validation and form handling for employee records.
- Designed and optimized relational database schemas, queries, and table relationships for efficient, reliable data retrieval.
- Integrated front-end and back-end components for dynamic content rendering and a responsive user experience.

Fashion Team Associate

August 2025 - June 2026

Walmart | Kansas City, Missouri

- Supported merchandising, inventory organization, and customer service in a fast-paced, high-volume retail environment.

Supervisor

May 2022 - August 2025

QuikMart

- Supervised daily store operations and a team of associates, including scheduling, task delegation, and floor coverage.
- Managed customer service, cash handling, and inventory while enforcing store policies and loss-prevention standards.

PROJECTS

IDA: Adaptive Grade 4 Mathematics Software | Thesis, Team Lead | React (Vite), Sass, PHP, MySQL, Figma

- Led the thesis team through design, development, and deployment of a full-stack adaptive learning platform teaching Order of Operations (PEMDAS), using content-based filtering to generate personalized learning paths that target each student's weak areas.
- Validated with 41 Grade 4 students at University of the East - Manila, achieving a 20% improvement in average test scores (Wilcoxon signed-rank, $p < 0.05$).**
- Prototyped the interface in Figma before development; deployed as a live web application with progress tracking.

RecoLab: Content-Based Recommendation Engine | *Python, JavaScript*

- Recommender built from scratch (TF-IDF, cosine similarity, precision@k/MRR/NDCG) with no numpy or scikit-learn; browser demo reproduces the Python CLI's scores exactly. 56 tests.

Sentinel: Security Audit Toolkit | *Python*

- Grades HTTP security headers A-F, scans source trees for committed credentials with redaction, and scores password strength by entropy and guessability. 90 tests; exits non-zero for CI.

ShopLite: E-commerce API | *Python, FastAPI, SQLAlchemy*

- Searchable catalog, carts with stock control, and checkout that snapshots prices into immutable order history; money stored as integer cents. 22 tests.

UIKit: Accessible Component Library | *JavaScript, ARIA, Playwright*

- Seven dependency-free components including a focus-trapping modal and roving-tabindex tabs; 27 tests drive real key presses and assert where focus lands.

TaskFlow: Kanban Task Manager | *Node.js, Express, SQLite, JWT*

- JWT auth, per-user ownership enforcement, and drag-and-drop whose card positions are renumbered transactionally server-side. 22 Jest + Supertest tests.

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900), Microsoft · AI Fundamentals, Google · Foundations of Project Management, Google · IT Specialist (ITS): HTML & CSS, Certiport
